Prepare for the AI-driven job market **HERE.**

The Applied Artificial Intelligence program offers intensive training to computer science and data science students, preparing graduates to excel in today's rapidly growing AI-driven job market.

This hands-on program emphasizes practical skills including machine learning, generative AI, and neural architecture design, setting students up for success in diverse sectors such as healthcare, finance, technology, and entertainment.

The Applied Artificial Intelligence program includes online courses as part of the curriculum through Newman University's partnership with Rize Education. This partnership offers students cutting-edge curriculum, greater scheduling flexibility, access to nationwide experts in the field and practice on even more resume-ready skills.

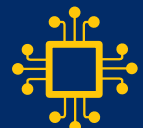

Design

Develop algorithms to help computers learn and solve tasks

Implement

Code & integrate machine learning into real-world AI solutions

Optimize

Improve AI systems to work better and faster

Innovative Problem-Solving

Newman University is dedicated to creating the next generation of AI leaders. Our Applied AI program merges theoretical knowledge with advanced practical applications, preparing students for a future where AI technology is commonplace. This program teaches students to build and deploy custom AI tools that are innovative, ethical, and sustainable, ensuring they are equipped to make a lasting impact across industries.

Creating Ethical Technology

We believe the future of AI must be human-centric. Our mission is to develop AI professionals who prioritize ethical considerations and human values in their work. In our program, you'll learn everything from how to evaluate trustworthiness of AI outputs to protecting privacy and IP. We equip students to design intelligent systems that enhance and complement human capabilities, ensuring AI serves as a force for good in our society.

Diverse Career Opportunities

Dream big and prepare for a future where AI is everywhere. At Newman University, we recognize the vast landscape of opportunities that AI presents. Our mission is to guide students through the diverse pathways in the AI field, offering a curriculum that balances technical acumen with industry-specific insights.

Career Pathways

— Bachelor of Science Degree —

Our Applied AI graduates find fulfilling careers in high-demand roles including:

AI Specialist

Computed Tomography (CT)

Machine Learning Engineer

Data Scientist

AI Product Manager

Software Engineer

Prompt Engineer

Program Focuses

on these key skills

Predictive AI Modeling

Data Structures & Algorithms

Prescriptive AI

Deploying Large Language Models (LLMs)

Evaluating Trustworthiness of AI Outputs
